Habit: Clumping

Diseases: Powdery mildew and fungal and bacterial spots may be problems

Day Length for Flowering: Long day

Do NOT bury the crown of the plug

## Description

This gem, found in Tasmania, offers striking, bold leaves with white margins and mottling. It forms a large clump with 3' to 4' tall ornamental flower stalks of pink and cream in late summer. A. mollis is tolerant of most soils but thrives in deep, fertile, moist, and well-drained conditions.
