Water Requirements: Dry moderately between waterings

Hardiness Zones: 4 - 8

Possible Problems: Insect: No major

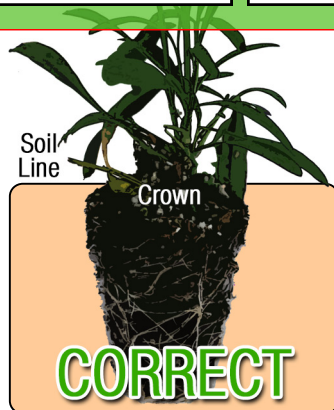

Diseases: Root and stem rot, leaf spot

Habit: Small scale groundcover

Day Length for Flowering: Day neutral

Do NOT bury the crown of the plug

## Description

This ground cover for moist sunny spots or even light shade is composed of small scalloped leaves of dark green, each with a irregular wide creamy border. Spreads via short rhizomes which quickly form new plants, resulting in a nice mat. The clumps are topped with short spikes of blue-lavender flowers in late spring. 'Vanilla Chip' will not aggressively take over, as will some of the more rambunctious member of the genus.
