

Growing Recipe

ATHYRIUM 'PEWTER LACE'

Approximate Finish Time From Liner

☐ = Minimum ☐ = Maximum

pH: 5.5 - 6.5

Fertilization Recommendations: 50 - 75 PPM

EC: 0.5 - 0.7

Light Levels: Shade

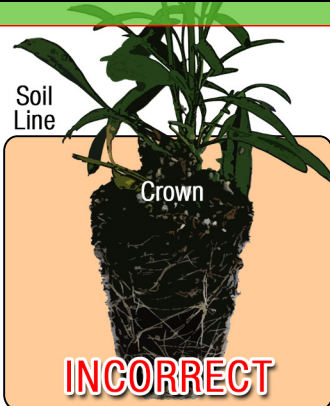

Water Requirements: This plant likes humidity, so keep evenly moist. Drought can force plants into dormancy.

Hardiness Zones: 4 - 9

Possible Problems: Insect: Slugs might sample it
Diseases: Crown and root rot may occur with poor drainage

Habit: Clumping

Day Length for Flowering: Day neutral

Do NOT bury the crown of the plug

Description

An exceptional Japanese Painted Fern with pewter metallic foliage. The deeply contrasting mid-rib in burgundy-purple is a nice plus. Tolerant of heat and humidity (will need moisture in the south). Likes a rich, fertile soil. Combines well with Tiarella and Hosta.
