Hardiness Zones: 7 - 11

Possible Problems: Insect: Slugs

Diseases: May root rot if grown too wet

Habit: Mounding

Day Length for Flowering: Day neutral

Do NOT bury the crown of the plug

Description

Heavily silvered, maple-like leaves on a ZONE 7 Hardy Begonia. Vigorously grows to form a striking 16" tall specimen. Pink flowers in late summer extend the show. From a cross between two hardy Chinese begonias - a breeding breakthrough! American Begonia Society "Distinctive hybrid" award in 2008.
