

Growing Recipe

CAMPANULA 'BOWL OF CHERRIES'

Approximate Finish Time From Liner

□ = Minimum □ = Maximum

pH: 5.6 - 6.8

Fertilization Recommendations: 50 PPM

EC: 2.0

Light Levels: Full sun to part shade

Water Requirements: Dry slightly to moderately

Hardiness Zones: 5 - 8

Possible Problems: Insect: Aphids, powdery mildew and rust are possible

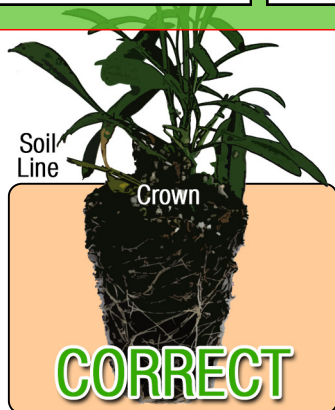

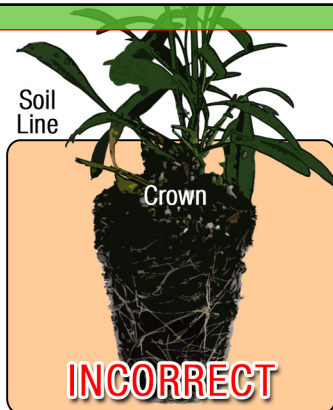

Habit: Compact mound, groundcover

Diseases: Powdery mildew and rust are possible

Day Length for Flowering: Long day

Description

This Campanula forms a compact mound with a multitude purple red bells above the foliage like a bouquet. With deadheading you will have prolific flowering and rebloom.

Do NOT bury the crown of the plug
