Hardiness Zones: 7 - 10

Possible Problems: Insect: No major

Habit: Mound

Diseases: No major. Cistus are very susceptible to root rot in wet soils.

Day Length for Flowering: Day neutral

Do NOT bury the crown of the plug

## Description

The first all-gold leaved Cistus hybridus! 'McGuire's Gold' has a low, mounding habit with evergreen foliage. Use to create contrast or as an accent in the sun garden. Charming white flowers dot the foliage in May and June. Foliage is lush and the plant is naturally well-branched. Drought resistant once established; a serious attention getter! Use in fall mixed containers too.
