Possible Problems: Insect: No major problems

Diseases: No major problems

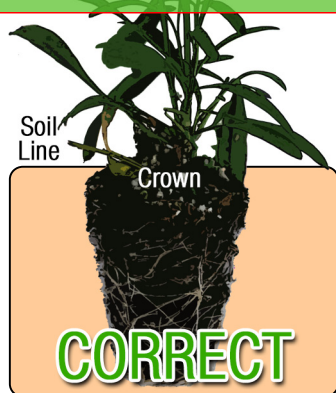

Habit: Trailing mound

Day Length for Flowering: Day neutral

PGRs: Not required or recommended

Do NOT bury the crown of the plug

Description

Medium-large, honey-amber foliage is red-veined and peppered with cherry red splashes and occasionally dotted with pink and white splashes. Short internodes and great branching keep this one compact. This results in a graceful and full habit. 'Honey Pie' is dramatic alone and elegant in a mixed container. Forms a large, full basket quickly for fast sales.
