Habit: Trailing mound	PGRs: Not required or recommended	
Day Length for Flowering: Day neutral		

Do NOT bury the crown of the plug

Description

The foliage has a bright lime edge with a scarlet center that fans out over a rippled and rounded-toothed border. Its dense, full cascading habit looks perfect alone in a basket. Combine with trailing annuals like Calibrachoa and Angelonia. Branches well with no pinching. An excellent replacement for Impatiens.
