Possible Problems: Insect: Aphids; leaf miners, mealybugs on bulb scales

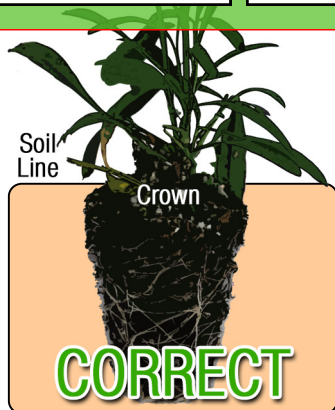

Habit: Clumping

Diseases: Pythium possible

Day Length for Flowering: Long day

Do NOT bury the crown of the plug

Description

Glowing, sword-like foliage changes from coppery-gold in the spring to a burnished green-gold in the summer. The ruffled foliage is upright and not floppy like some cultivars. A true breakthrough in color that surprises our visitors. Creamy-white flowers on a pineapple-like spike complement the golden foliage. A simple and elegant beauty.
