

Growing Recipe

HEUCHERELLA 'HOT SPOT'

Approximate Finish Time From Liner

 = Minimum  = Maximum

pH: 5.5 - 6.5

Fertilization Recommendations: 100 - 150 PPM

EC: 0.6 - 0.9

Light Levels: Shade to part shade

Water Requirements: Dry moderately between waterings

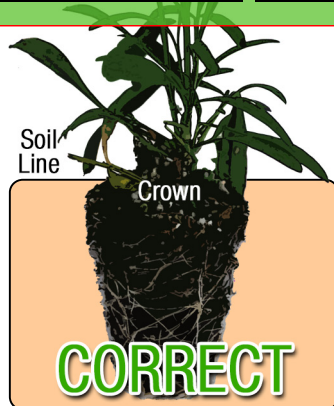

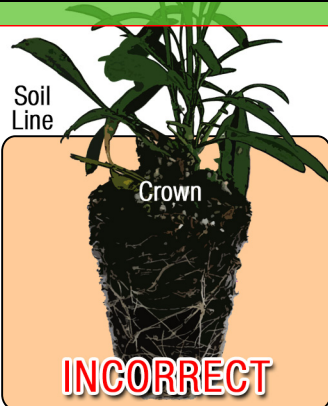

Hardiness Zones: 4 - 9

Possible Problems: Insect: Foliar nematodes may be a problem for gardens in susceptible areas. Watch for root weevils.

Habit: Mounding

Diseases: Root rot may occur with excessive soil moisture or poor drainage. **Note**: All Heucherella are rust resistant.

Day Length for Flowering: Day neutral

Do NOT bury the crown of the plug

Description

The best of both worlds: bright pink flowers and a trailing habit. With a long bloom time and creeping habit, this plant makes an excellent container plant or a groundcover. A large red spot in the center of lime-green leaves will draw your eye from across the garden! Blooms from late spring until frost here.
