Possible Problems: Insect: Aphids, slugs are possible
Diseases: Botrytis can be a problem if the foliage is kept too moist. Leaf spot.

Habit: Clumping

Day Length for Flowering: Day neutral

Do NOT bury the crown of the plug

Description

This superb, brightly silver-spotted beauty will give rise to profuse clusters of large cobalt-blue flowers in spring. A stunner! We feel it is our best, true dark-blue and grows into a magnificent landscape specimen. The roots of this plant are in P. longifolia, the best form for the south, according to John Elsley.
