

Growing Recipe

SILENE 'ROCKIN' ROBIN'

Approximate Finish Time From Liner

 = Minimum  = Maximum

pH: 5.8 - 7.0

Fertilization Recommendations: 50 - 100 PPM

EC: --

Light Levels: Full sun or afternoon sun

Water Requirements: Dry moderately between waterings

Hardiness Zones: 5 - 9

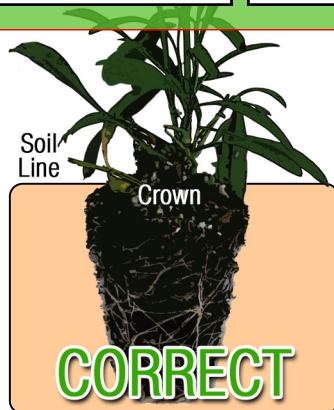

Possible Problems: Insect: Aphids are possible
Diseases: Root rots, if too much shade and fertilizer provided

Habit: Clumping

Day Length for Flowering: --

Do NOT bury the crown of the plug

Description

Here's an amazing hybrid of *Silene regia* (the wake robin, one of the Southeast's favorite wildflowers). Totally hardy and sterile. The beautiful coral and cut flower petals lie close to the compact foliage and being sterile, the flowers seem to come out continually! Thrives in heat and humidity. Try in containers. Needs good drainage. Blooms all summer if cut back periodically.
